Policy on Employment in FIM Doping Control Positions

As a declaration to our governing members, it is our policy to comply with anti-doping policies and rules which conform with the FIM Anti-Doping Code and the WADA International Standards.

In this vein, and according to article 20.3.5 of the FIM the Anti-Doping Code, the FIM and its National Federations agree to refrain from knowingly employing any person in any position involving Doping Control, who is provisionally suspended for an anti-doping rule violation or is serving a period of ineligibility under the FIM Anti-Doping Code or any person not subject to it that has directly and intentionally engaged in a conduct within the previous six (6) years that would have constituted a violation of anti-doping rules if the FIM Anti-Doping Code-compliant rules had been applicable to such person.

We believe that this policy is essential to maintaining the integrity of our organization and ensuring that we are doing our part to promote clean and fair competition in sports.
