29-3  Starting procedure will be detailed in the 2nd team managers briefing to be held on Sat.31st October.

CHAPTER 9  BEHAVIOR DURING PRACTICE AND RACE

ART.30  STopping ON THE TRACK
Riders who wish to withdraw from the race following an accident or mechanical trouble must notify the nearest track marshal of this fact, and turn in a withdrawal report provided for this purpose. The rider must exit the track, leaving his motorcycle with the track marshal after submitting a withdrawal report.

ART.31  BEHAVIOR DURING PRACTICE AND RACE
31-1  All motorcycles in returning to their pits must use the regular pit entry road. However, as an exception, during all sessions other than the race, they may return to their pits through the East Shortcut course, in which case the lap time concerned will be cancelled.
31-2  Should a rider have a problem with his motorcycle between Turn 16 (the last chicane 1) and the Control Line, he may return to the pit only under the official’s instructions.
31-3  If it is necessary to go in the opposite direction to the race on the pit entry road or in the pit lane under unavoidable circumstances to return to the pit, the rider must push the motorcycle under the official’s supervision. Riding the motorcycle with the engine running is not permitted under any circumstances.
31-4  In every case, a rider returning to the pit through the regular pit entry road shall have the right of way.
31-5  If a rider gains any advantage when he re-joins the track after going off, a penalty will be imposed.

ART.32  NEUTRALIZATION OF THE RACE
32-1  Two “Safety Cars” with flashing orange lights on the rooftop will enter the track at the point just before Turn 1 (the 1st corner) and past Turn 11 (Hairpin curve) simultaneously.
32-2  The Safety Cars, at the order given by the Clerk of the Course/Race Director to call in the “Safety Car”, will turn off orange lights, as soon as they pass the next Safety Car post.
32-3  Then the former SC will pull off the track past Turn 9 (the “Degner corner 2”) into the runoff area on the right, and the latter will enter the pit entry road for cars at Turn 18 (the last corner).
32-4  A neutralization exercise will be conducted during the event.
ART.33  RECOVERY VEHICLES (“Service Cars”)
33-1 Two service cars will be deployed in the track at this event.
33-2 During the race, if a rider, due to a fall or mechanical trouble, needs to push his bike back to his pit, he will be allowed to return on a service car together with his bike from three locations around the track: Turn 9 (Degner corner 2) on the left, the opening on the right between Turn 11 (Hairpin curve) and Turn 12 (200R chicane) and Post No.24 (West Race Control) on the right between Turn 14 (Spoon curve 2) and Turn 15 (130R) to the paddock (near the medical helipad).
33-3 Mechanics for such rider can wait near the medical helipad, from where they can get their bike back to their pit-box. 33-4 No penalty will be imposed such as cancellation of the lap due to this recovery service.

ART.34  ENTERING AND LEAVING PITS
34-1 The area in front of the pit (pit lane) is divided into 3 different sections:
a. Fast Lane: This area is for the exclusive use of entering and leaving the pits and the speed must be reduced.
b. Auxiliary Lane: This area is crossed when going from the Fast Lane to the Working Area and vice versa.
c. Working Area: This area is used to perform pit work and is also a stopping area for machines. In addition, it is not allowed for team guests to go beyond the red line into the area at the pit lane side.
A rider wishing to make a pit stop must move to and stay on the right side of the track before Turn 15 (130R) and enter the pit entry road just before Turn 16 (the last chicane 1) after making sure that it is safe to do so. Also, he must not ride through the working area.

When a rider comes in for a pit stop, he must enter the working area at the closest point to his pit and stop as close as possible to his pit.

A rider and his pit crew with their machine in the working area must be careful not to impede the passing of other motorcycles entering or leaving the pits during a pit stop.

If a rider should overshoot his pit as he comes in for a pit stop, he may be assisted in pushing his motorcycle back to the pit by his pit crew with the engine turned off, with permission from a pit marshal.

A rider must be aware that a motorcycle going out first in the pit lane has the right of way in the fast lane. A rider may leave the pit only under a pit marshal’s instructions.

After leaving the pit lane to enter the track, a rider must stay on the right side of the track until he comes to the second turn, and while doing so he must not get in the way of other motorcycles coming from behind. The following rule will apply with regard to the white line painted on the track from the pit exit toward turn 1:

1. A motorcycle leaving the pit lane to enter the track must stay to the right of the white line.
2. There will be no restrictions on the motorcycles approaching on the track.

See the map below for the starting point of the speed limit in the pit lane.

36-2 Any motorcycles being worked on inside the pits and/or coming in to the pit will be placed under ‘Parc Fermé’ control, too. All work in the Parc-Fermé is prohibited. However, if the race is stopped with less than three laps covered, motorcycles will not be placed under ‘Parc-Fermé’ control. In this case, riders may come straight back to their pits.

36-3 If the red flag is given:

1. One mechanic per motorcycle is allowed to go to the Parc Ferme and support the motorcycle with a stand, but no other work is permitted until further instruction is given by the official.

38-3 Any motorcycles that have received the chequered flag but are unable to complete another full lap may return to the paddock via the U-turn road on the right side of the track before the 1st corner (asphalt section off the track). In this case, the rider must enter the U-turn road, paying full attention to any other motorcycle approaching from behind and ensuring safety.
